

# SMART WAREHOUSE

Automation of your production

Intelligent. Modular. Effective.

The requirements in terms of flexibility and product variance are constantly increasing, and more demanding material flows require efficient solutions! The cts Smart Warehouse stores the magazines in a space-saving and and close to production - traceable and fully automatically deliverable by means of AMR. This saves you valuable space and optimise your material flow.

The cts Mini Smart Warehouse closes the gap to its established big brother. It is aimed at companies with a storage requirement of <300 magazines. With a footprint of 4.2x4.2m, it is an efficient and space-saving solution that can be used in almost any production facility.

### The advantages at a glance:

- Intelligent, modular and highly effective
- Significant reduction of shop floor occupancy due to high storage density
- Automatic loading/unloading through AMR
- Individual adaptations possible as a matter of course
